Summary

I’m a dedicated and passionate developer completing a Bachelor of Science in Information Technology (Software Engineering) degree, who enjoys both front end and back end development. I’m a swimmer, artist and gaming enthusiast who’s open to new experiences and perspectives in life.

Experience

VitiSense (Progressive Web Application) **September 2026 – Current**

- Collaborating with five other individuals on a capstone project, we are developing a Mildew disease detection and reporting progressive web application in VS Code with React Next JS.
- Responsible for the front end by assisting with developing reusable components such as line graphs and timelines that retrieve and display mildew data in a time range of 24 hours to 7 days.
- Assisted with the integration of sessions with session storage and persistent authentication through localStorage.
- Developed the global navigation of the progressive web application by implementing an app bar.

Heroic Hybrids Demo (2D Video Game) **May 2025 – Current**

- Sole developer of a 2-dimensional platforming game that has an emphasis on speed, momentum and combat on Godot in GDScript.
- Sole artist of all in-game sprites such as character sprite sheets, tile map sprite sheets, dialogue faces.
- Notable features of the game include:
    - Platforming abilities include walking, jumping, slash attack, area attack, dash attack, shoot attack, piercing shot attack, burst shot attack, double jumping, sliding, slide jumping, hovering, creating a jumpable platform, ground and air dashing, wall jumping, creating a vertical boosting explosion, grapple swing and jump as well as y-axis gravity switching.
    - A reusable camera positioning and checkpoint system that can dynamically determine how many enemies the player has to defeat before moving onto the next section.
    - A reusable enemy gauntlet system that spawns instances of enemies based on the configuration presented before it starts.
    - A reusable dialogue system that contains custom text, character portraits as well as custom effects like delayed text.
    - Multiple enemies and two boss fights with attacks different from the player like arcing projectile attacks and boomeranging projectile attacks.

Education

Eduvos Tyger Valley (Private Higher Education Institution) **January 2024 – Current**

Completing a Bachelor of Science in Information Technology (Software Engineering) degree, Current

2026

- A+ certification

2025

- Golden Key International Honour Society Member – Inducted for ranking in top 15% academically
- Managing Operations (SC) Certificate
- Block 4 Class Representative Certificate
- Block 3 Class Representative Certificate

Academic distinctions and top modules

Year	Modules	Final Average
2026	Object Oriented Systems Analysis and Design	93%
	Web Development and e-Commerce	92%
	Enterprise Programming in C# (elective)	91%
	Research Design and Methodology	89%
	Operating Systems	75%
2025	Programming in C# (elective)	99%
	Database Systems	99%
	Usability Engineering	96%
	Data Structures and Algorithms in C#	90%
	Mobile Application Development and Big Data	89%
	IT Project Management	88%
	Web Server Management	88%
2024	Introduction to Programming	98%
	Procedural Programming	93%
	Computer Skills (Microsoft)	93%
	AI Ethics and Privacy	88%
	Computer Network and Security	82%
	Cloud Based Technologies	79%
	Linux-based Operating Systems	76%
	Non-Technical Skills for IT Professionals	76%
	Computer Network Technologies	76%
	Introduction to Information Systems	75%
	Mathematics 1B	75%

Protea Heights Academy High School (High School) **January 2019 – December 2023**

National Senior Certificate, 2023

2023

- Academics Team Award
- Programming Olympiad (1st round silver certificate)
- Robotics Honors
- Robotics Best Senior
- First Tech Challenge National Competition

2022

- First Tech Challenge National Competition
- Mathematics Olympiad

2021

- Gear Up Advanced Arduino Course
- Physical Science Olympiad
- Mathematics Olympiad

2020

- Gear Up Beginner Arduino Course
- World Robotic Competition
- Mathematics Olympiad

2019

- Mathematics Olympiad
- First Lego League Regional Competition
- Participation in National Science Week
- Participation in World Robotic Olympiad

NSC Results:

Subject	Achievement Level
Information Technology	91%
Engineering Graphics and Design	89%
Life Orientation	75%
English Home Language	73%
Physical Sciences	71%
Mathematics	69%
Afrikaans First Additional Language	66%

Skills

Programming Languages: C#, C++, PHP, GDScript, Delphi, Java and JavaScript, XML.

Front End: HTML and CSS.

Databases: MS SQL, Oracle, MongoDB and Neo4j.

Frameworks: .NET, ASP.NET Core and React Next JS.

IDE: Visual Studio, VS Code and Android Studio.

Repositories: GitHub and Git

Events

Events **2026 - Current**

2026

- Presenting VitiSense at Eduvos's IT and GD showcase.
- Presented Heroic Hybrids at Eduvos's IT and GD showcase.
