Introduction

Background

This user manual describes how to effectively utilise the features provided by the C2C e-commerce platform. This C2C e-commerce platform promotes local community engagement between buyers and vendors through features that enable buyer and vendor interactions, like the chat feature. The additional interactions provided by this C2C e-commerce platform allows both the buyer and vendor to collaborate effectively to complete deliveries despite any issues that occur, such as a delivery location that either the buyer or vendor might find difficulty with reaching. Therefore, this C2C e-commerce platform is designed to accommodate both buyers and vendors despite local related issues.

About this website

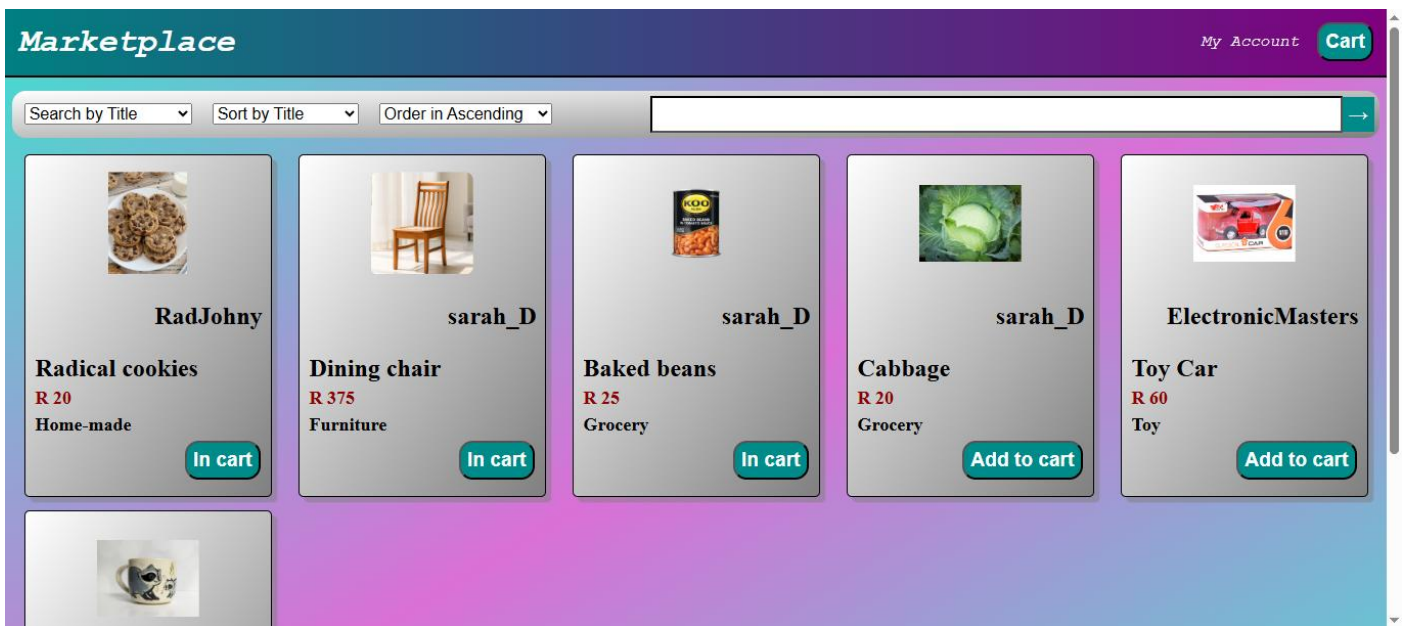

HTML files are utilised the frontend by defining the layout for all web pages in the C2C e-commerce platform. Moreover, the project utilises pure HTML web pages for web pages that won't display any dynamic content.

PHP files are utilised for the backend where data can be processed. The PHP files in the C2C e-commerce platform are used to either process data that is sent from other HTML or PHP files and interact with the platform's database if applicable, or be used in conjunction with HTML code to create a web page where it's layout and content are dynamic.

A CSS file is utilised for defining the styling of each web page, which consists of making the C2C e-commerce platform visually appealing as well as changing the styling to better fit different screen sizes, like desktop, tablet and mobile phones, in comparison to a consistent style that might be unreadable for certain screen sizes.

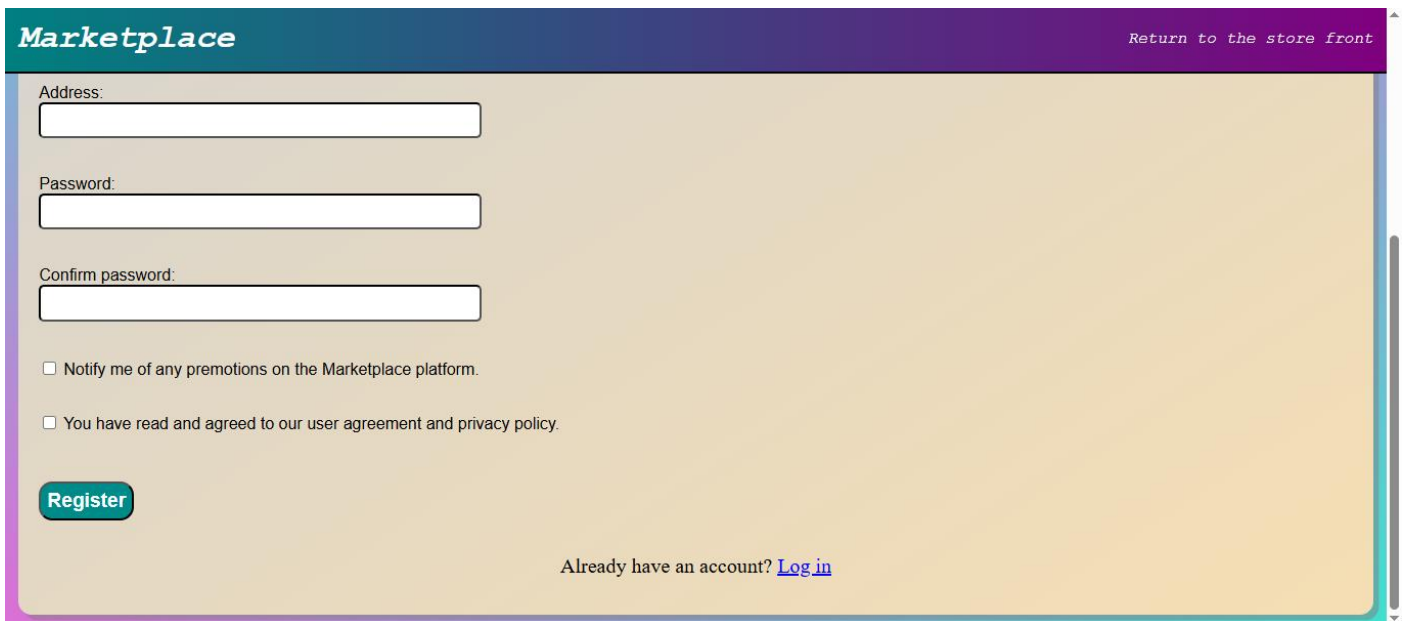

A JavaScript file is utilised for providing quick and responsive data validation when users input data, which enables users to easily resolve the issue that they created. Furthermore, JavaScript is also used for additional interactivity on the C2C e-commerce platform.

Basics: Accessing the website

The website is initially accessed by entering the main dashboard. However, you won't have access to features like adding products to the cart and accessing the cart, because you haven't registered or logged into an account yet. Therefore, you should press the "My Account" link on the left-hand side of the cart button, located at the top right of the above image.

A screenshot of the Marketplace website's registration page. The header is a dark blue bar with "Marketplace" on the left and "Return to the store front" on the right. The main content area has a light beige background with the title "Register an account" in bold. Below the title are several input fields for registration: "First name:" and "Last name:" (two separate fields), "Username:" and "Phone Number:" (two separate fields), "Email:" (one field), "Address:" (one field), "Password:" (one field), and "Confirm password:" (one field, partially visible at the bottom).

The image shows a registration form for a Marketplace. At the top, there is a dark blue header with the word "Marketplace" in white and a link "Return to the store front" in the top right corner. The form itself is on a light beige background. It contains three input fields for "Address:", "Password:", and "Confirm password:". Below these are two checkboxes: "Notify me of any promotions on the Marketplace platform." and "You have read and agreed to our user agreement and privacy policy.". A green "Register" button is located at the bottom left of the form area. At the bottom right, there is a link "Already have an account? [Log in](#)".

☐ Notify me of any promotions on the Marketplace platform.

☐ You have read and agreed to our user agreement and privacy policy.

[Register](#)

Already have an account? [Log in](#)

The “My Account” link will take you to the registration page where you can create a new account that will be registered by default as a buyer. However, if you already have an account on our C2C e-commerce platform then you can click the “Log in” link at the bottom of the web page that will take you to the login web page.

The image shows a login form for a Marketplace. It has a dark blue header with "Marketplace" and a "Return to the store front" link. The form is titled "Login to an account" and is set against a light beige background. It features two input fields: "Username:" and "Password:". A green "Login" button is positioned to the left of the input fields. The bottom of the page has a colorful gradient background.

Login to an account

Username:

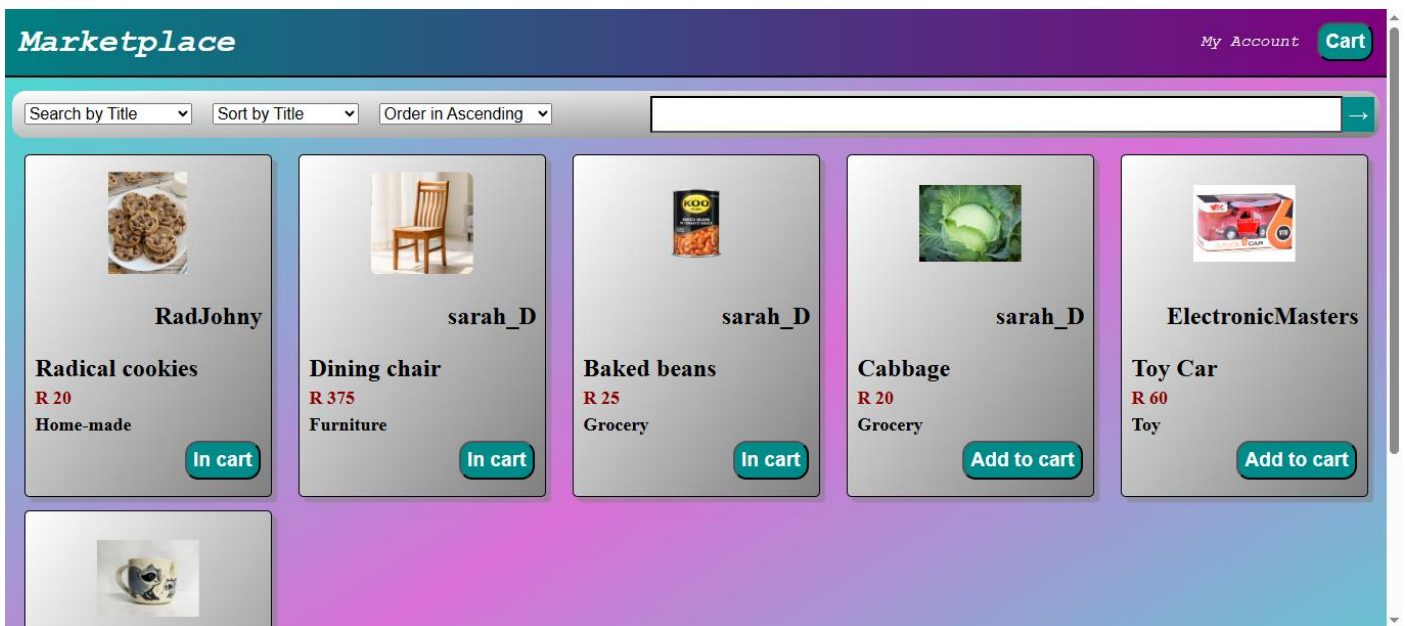

Password:

[Login](#)

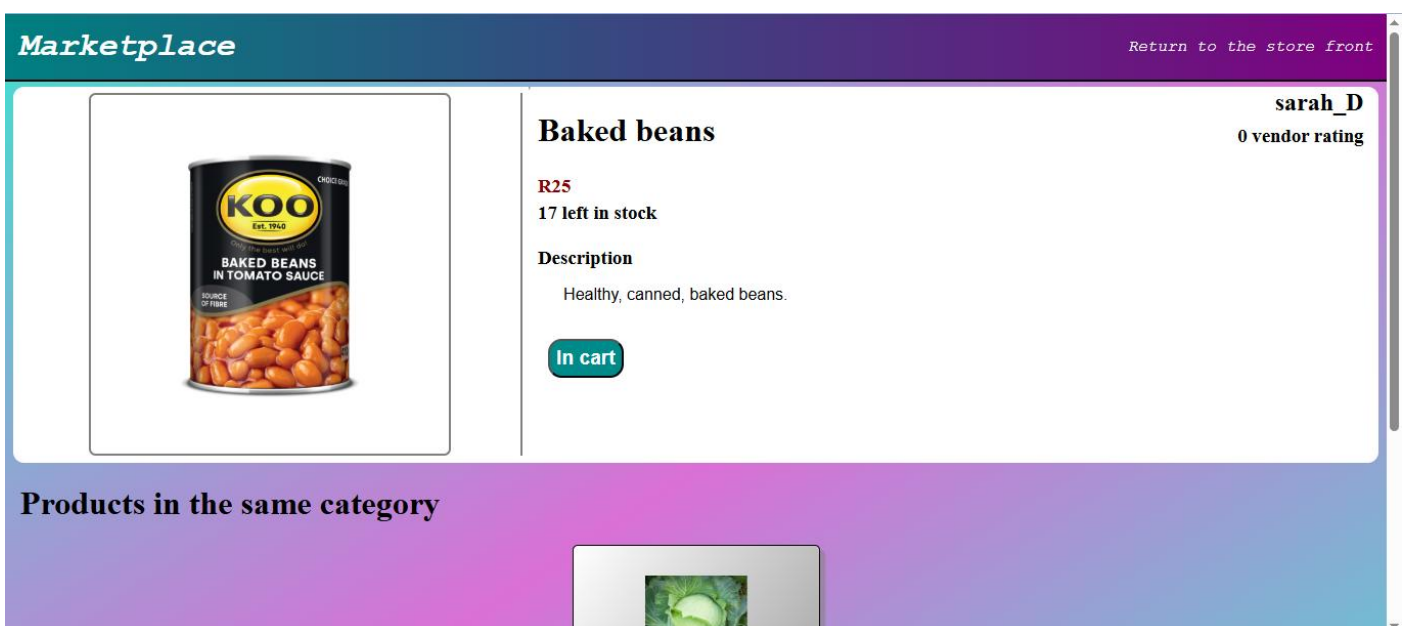

This is the login web page where you can enter the credentials of your account and login to your account.

After you register or login to an account, you will then have access to the features associated with the type of user you are.

The main dashboard and product pages

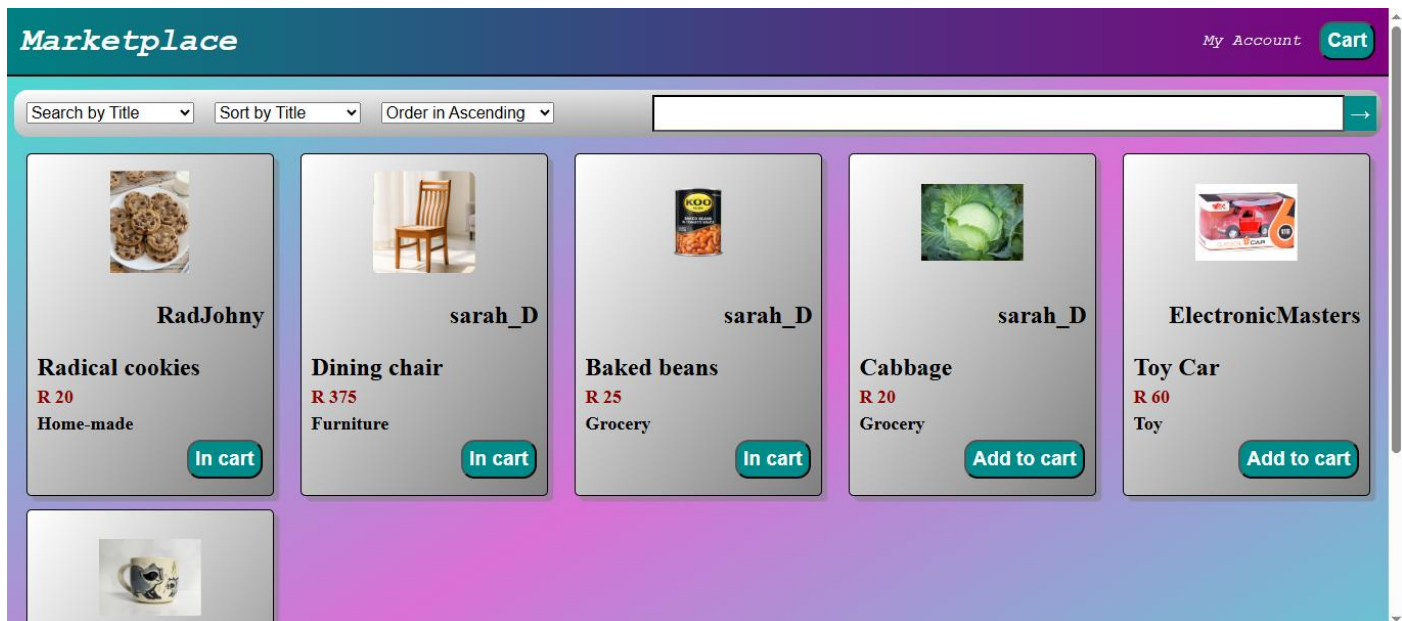

After registering or logging into an account, you can click the “Add to cart” button in the product tile to add the product to your cart. Adding products to your cart will create a new delivery if there are no deliveries with the vendor that is selling the specific product that you are adding to the cart. Moreover, the search bar can be used to search for specific products with additional searching functionalities like a search, sort and order by specification that narrows what you are looking for on the platform. Additionally, you can click the product image in order to open the product’s page that displays additional details about the product and also recommends other products in the same category of the original product as shown in the below image.

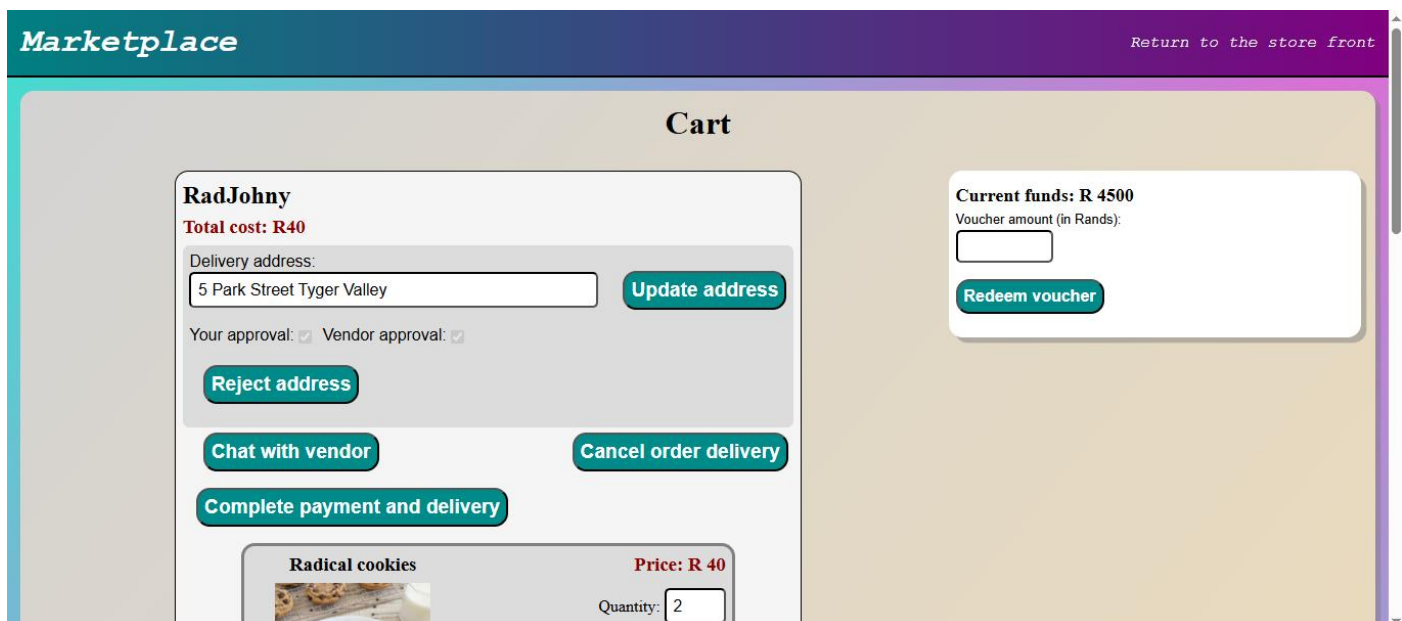

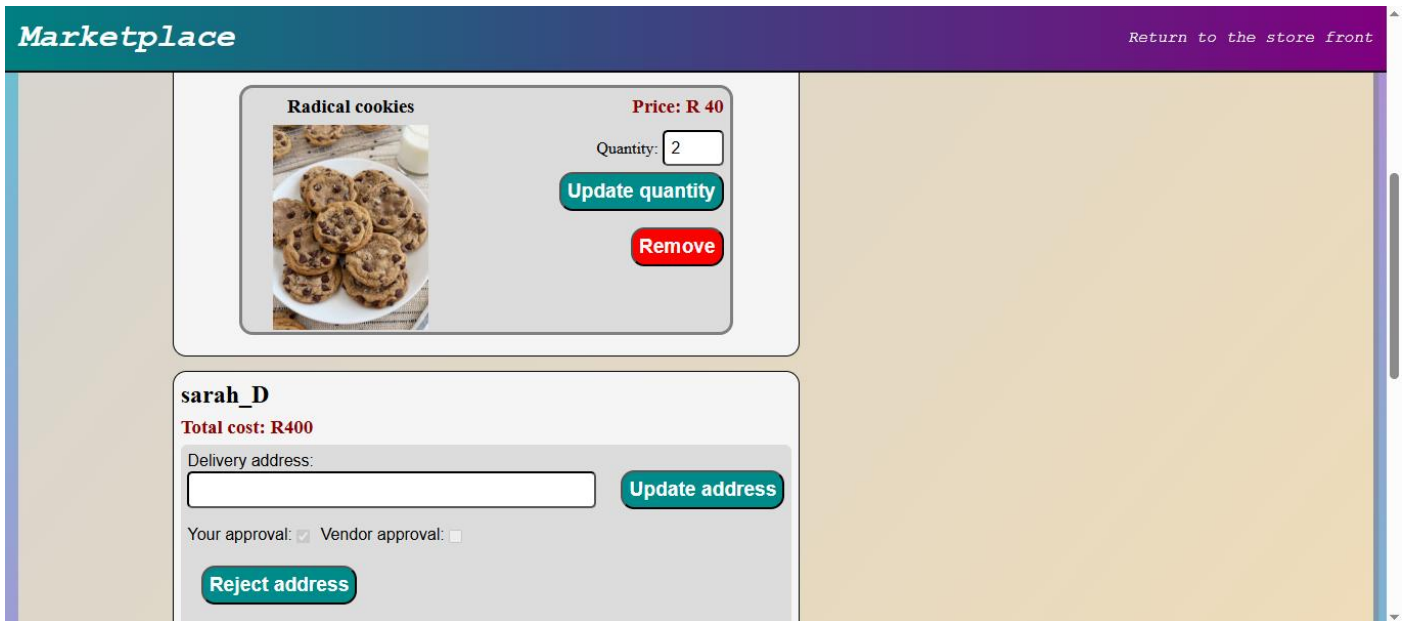

Delivery: Delivery management

Spender side of delivery management

When you want to manage and purchase a delivery, you must click the “Cart” button at the top right of the above image, which will take you to the cart page.

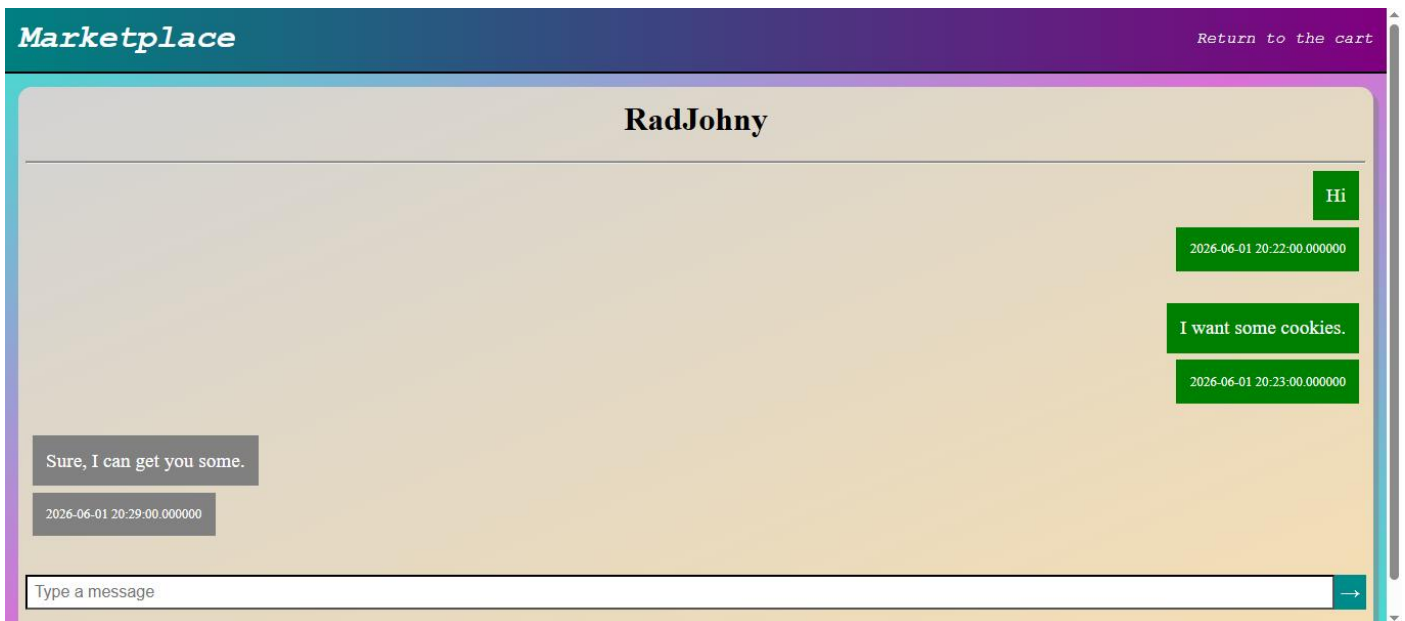

Each delivery with a vendor will show each product in the delivery and enables you to alter aspects of the delivery, which includes:

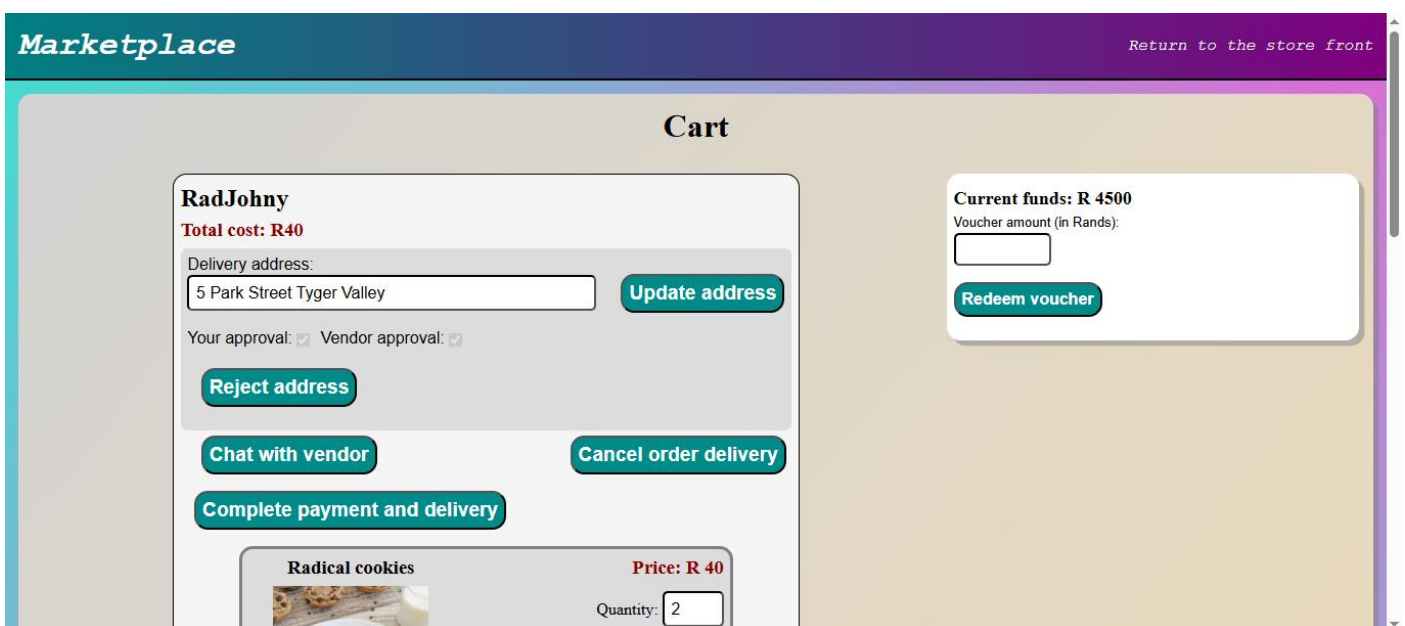

- Updating the delivery location by altering the address and confirming the update by clicking the “Update address” button. Updating the delivery address will automatically reset your and the vendor’s approval of the address.
- The delivery can be cancelled by clicking the “Cancel order delivery” button.
- The quantity of a product in the delivery can be updated by changing the quantity number and confirming it by clicking the “Update quantity” button.
- A specific product can be removed from the delivery by clicking the “Remove” button. If all products are removed from the delivery then the delivery is cancelled.

Before a purchase can be made, both you and the vendor that you are buying from must approve on the delivery address by clicking the “Approve address” button or reject the delivery address by clicking the “Reject address” button that replaces the “Approve address” button if you have already approved the delivery address.

Moreover, you can chat with the vendor by entering the chat page by clicking the “Chat with vendor” button.

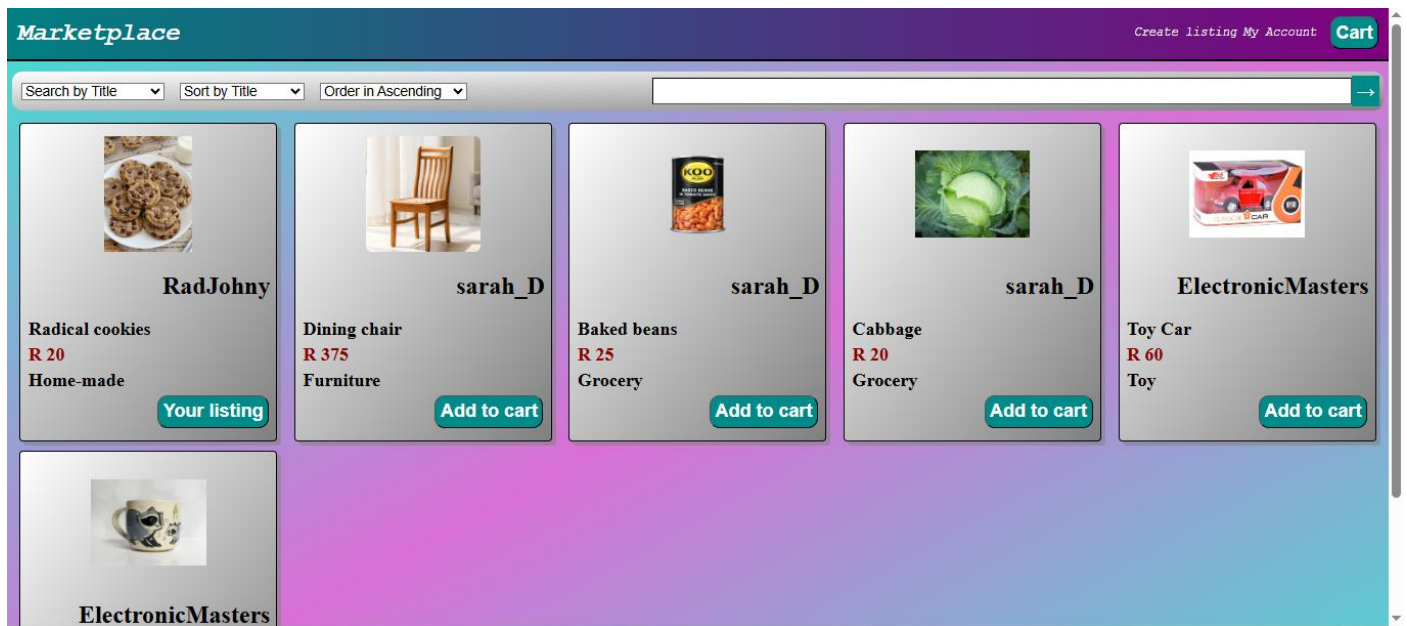

Both you and the vendor can communicate with each other by creating and sending messages in order to effectively handle issues that the delivery will face.

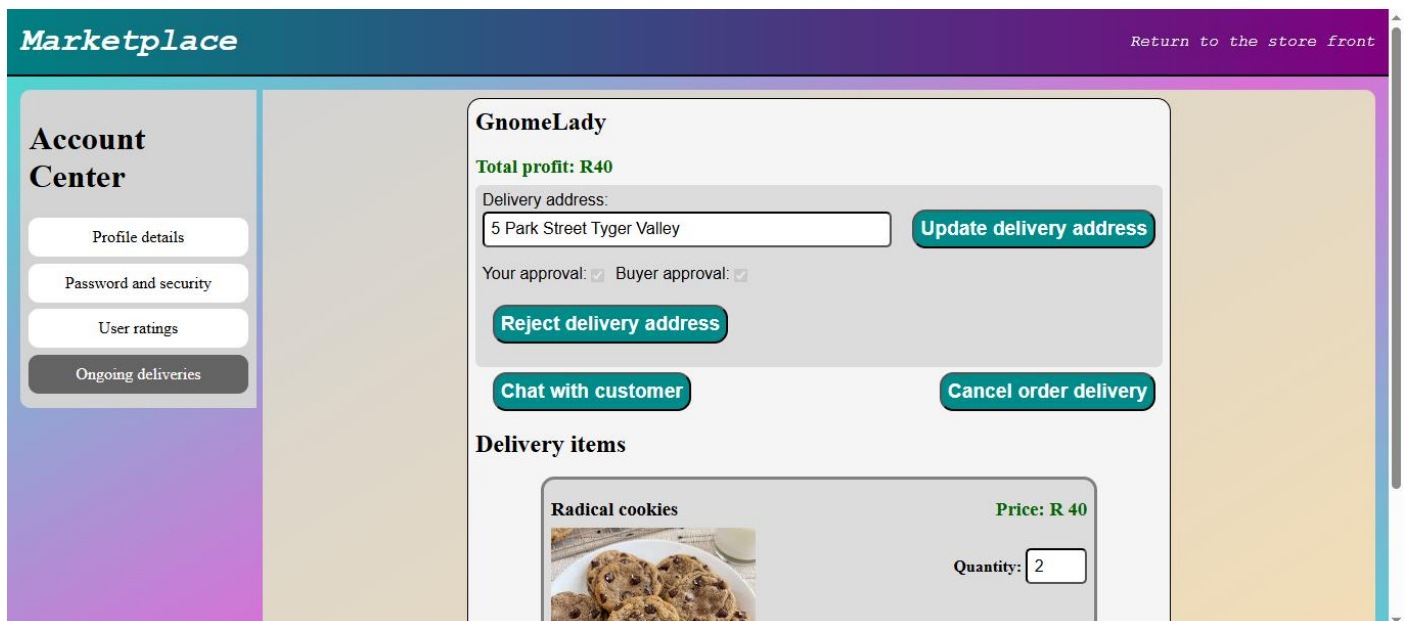

When both you and the vendor agree to the delivery address you can then click the "Complete payment and delivery" button to complete the delivery and enable both you and the vendor to rate each other in the account centre that is mentioned in the "Account Centre: Account management" section.

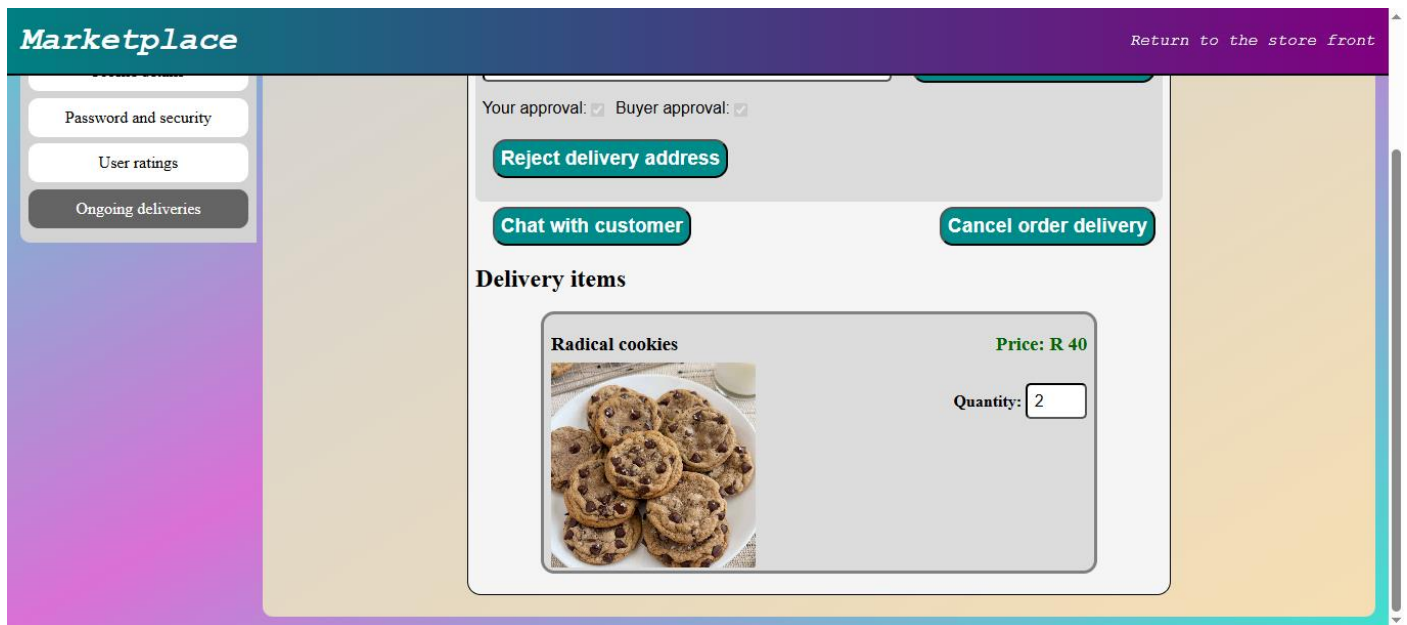

However, the payment will fail if you have insufficient funds. Therefore, you can add money to your account by entering the amount that you want on the "Voucher amount" input in the "Current funds" tile on the right-hand side of the above image and clicking the "Redeem voucher" button.

Vendor side of delivery management

If you are a vendor that is supplying the products for a delivery that another user is conducting with you, you should click the “My Account” link to enter your account centre and then click the “” button to access your ongoing deliveries page.

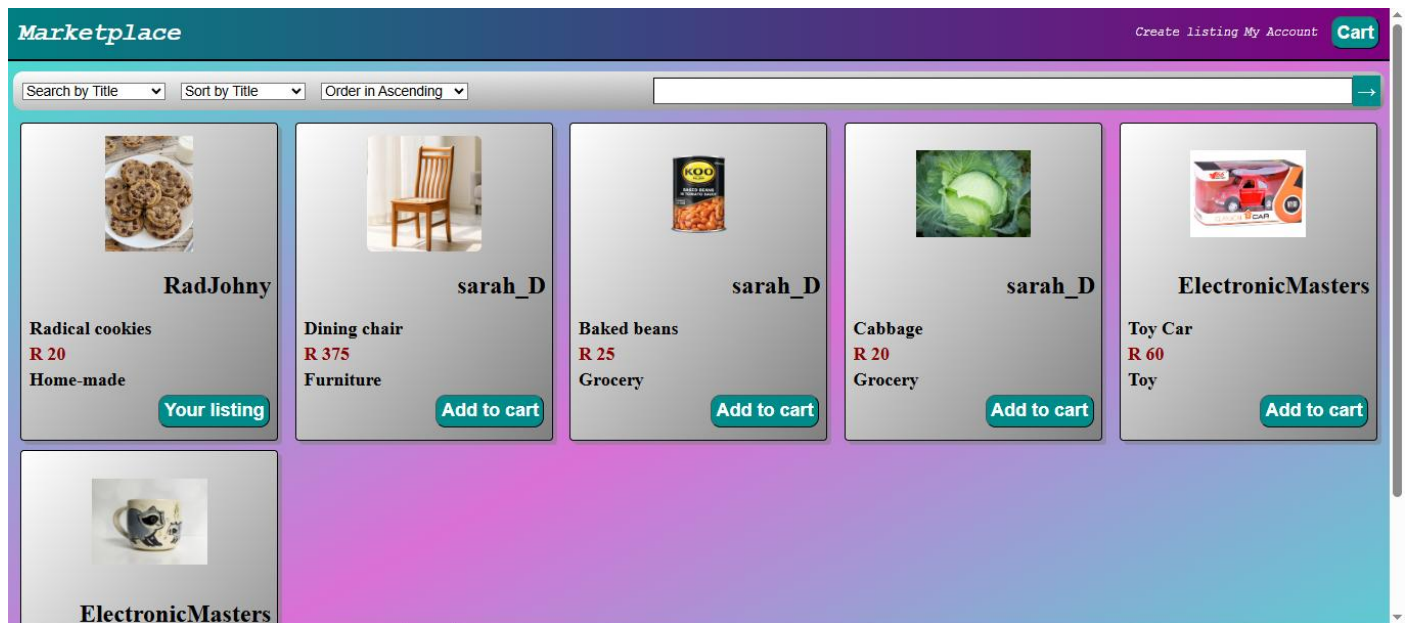

Similar to the spender side of delivery management, you can alter the delivery location, approve or reject the current delivery address, chat with the customer on the chat page and cancel the delivery.

Products: Product management

Create a product

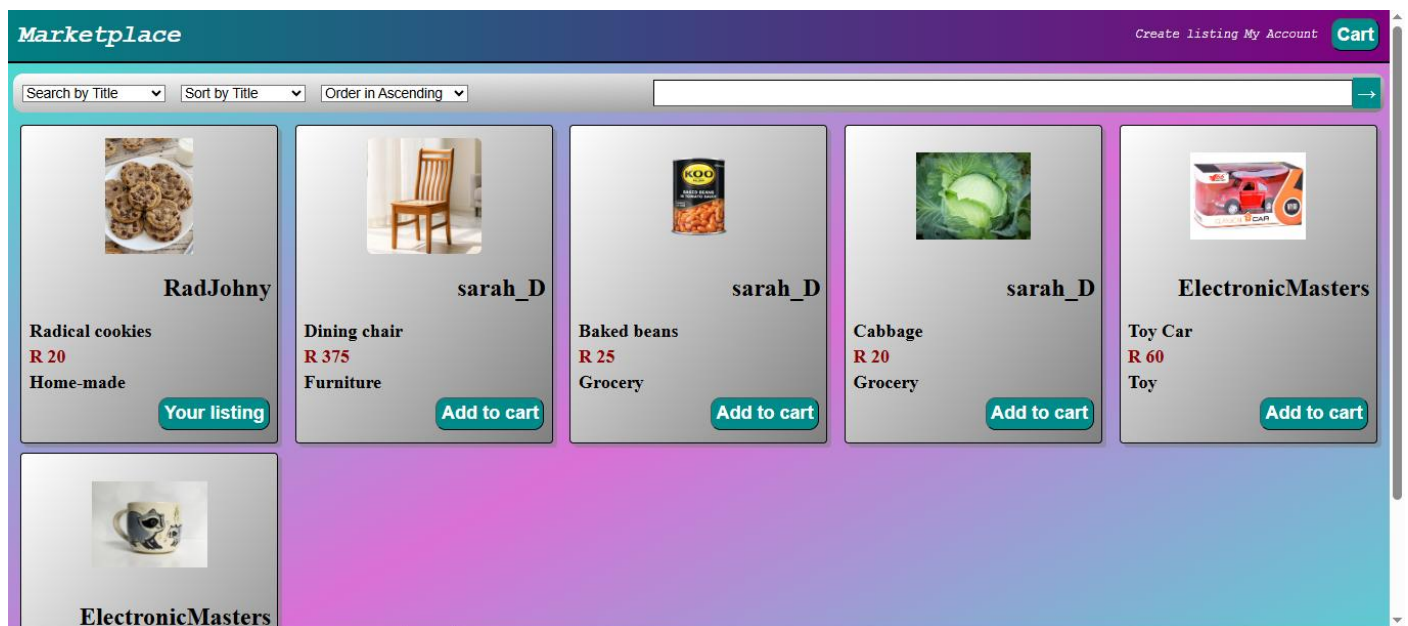

If you are a vendor, you can create a new product by accessing the create listing page by clicking the “Create listing” link next to the “My Account” link.

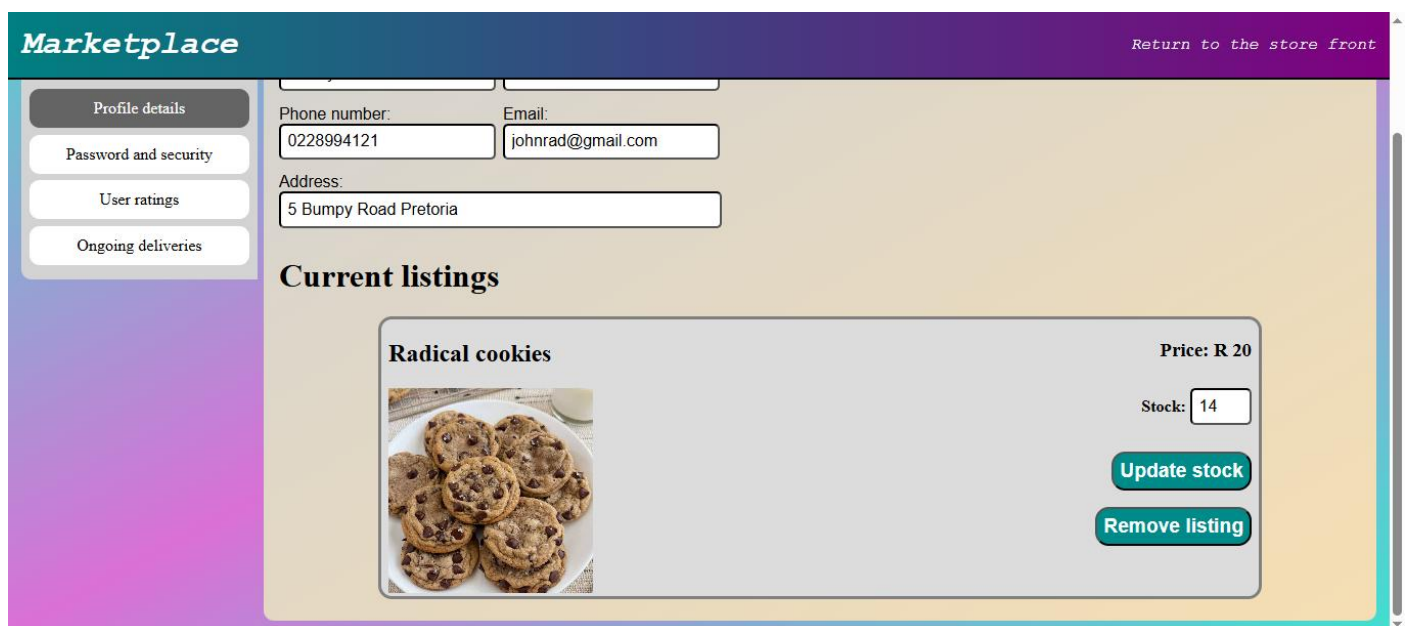

A screenshot of the "Listing details" form in the Marketplace application. The form is titled "Listing details" and contains several input fields: "Title", "Price", "Stock", and a larger "Description(Optional)" field. Below these fields, there are two sections: "Product categories:" with a dropdown menu currently set to "Home-made", and "Listing's image:" with a "Choose File" button and the text "No file chosen". A green "Create listing" button is located at the bottom left of the form area.

You can input the relevant product details in the provided input forms, enables you to select a single category to assign your product to and the ability to upload an image file (.png, .jpeg, etc) from your device by clicking the “Choose File” button.

Edit a product

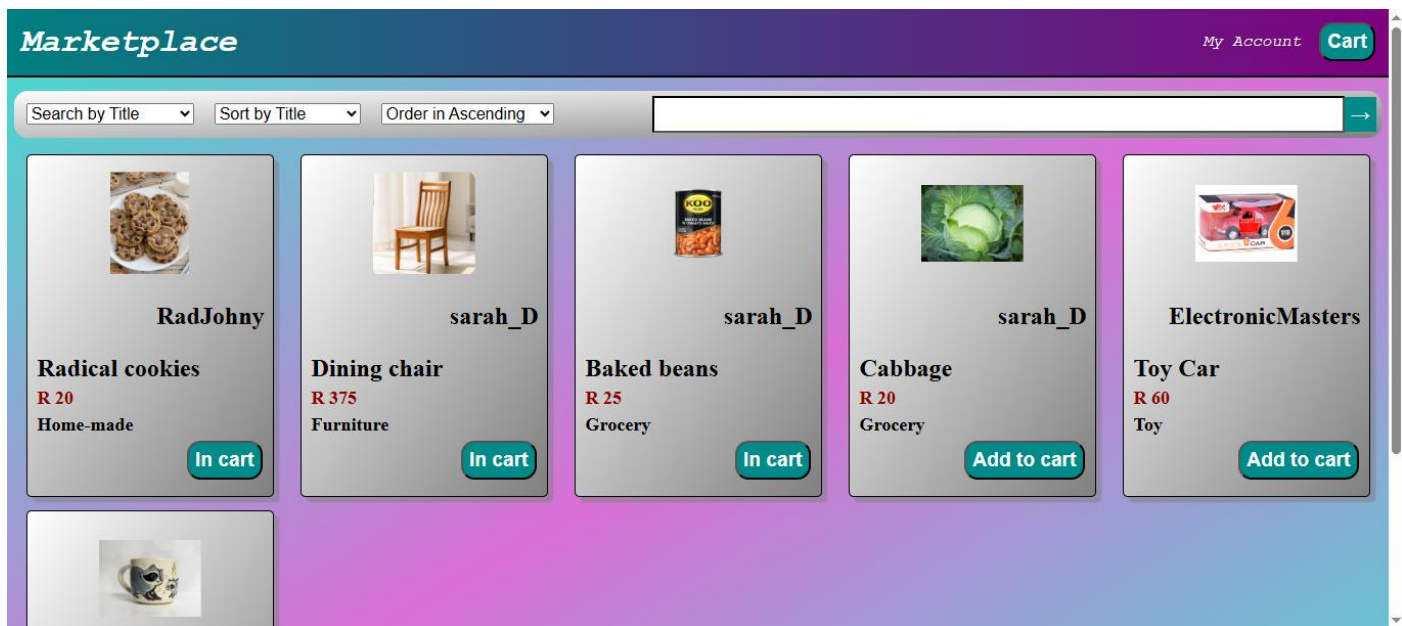

If you are a vendor, you can also view and edit all your products by accessing the profile details page by clicking the “My Account” link.

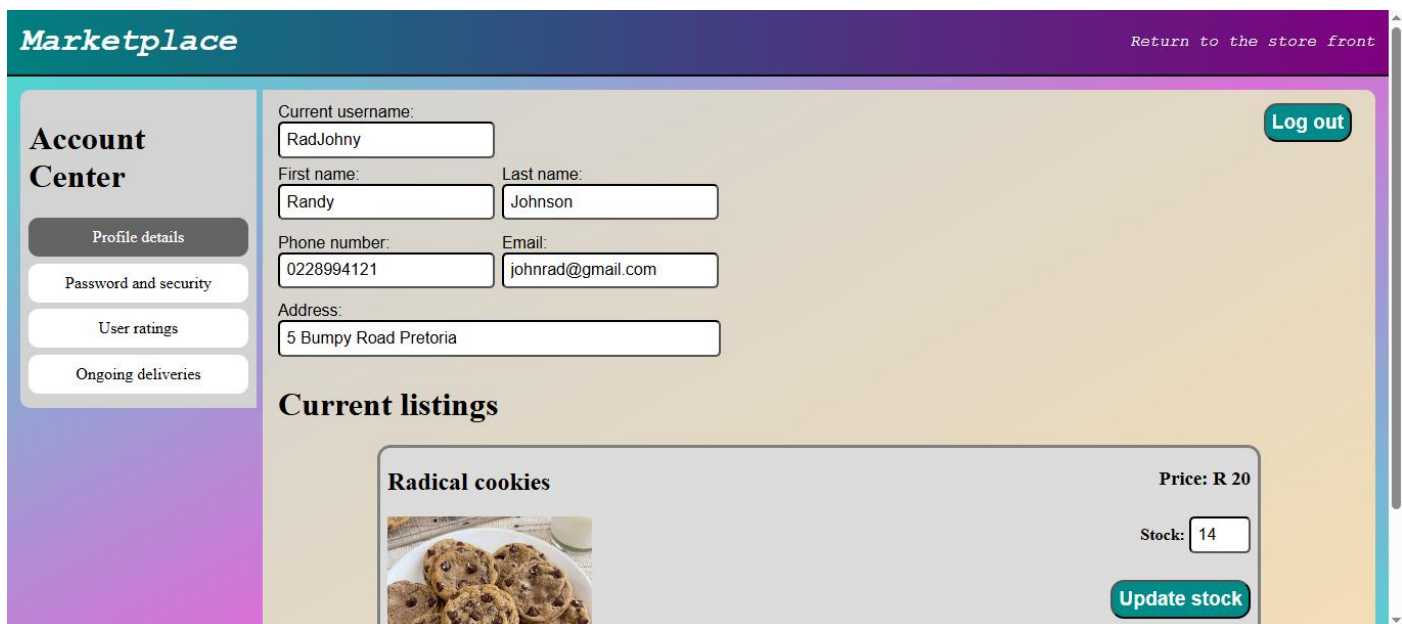

You can then edit the details of any products listed in the profile details page by altering the stock number and clicking the “Update stock” button to confirm the change as well as deleting the product by clicking the “Remove listing” button. Any products that are deleted will be removed from any deliveries that had it as a cart item and will also delete the delivery if it’s the last cart item.

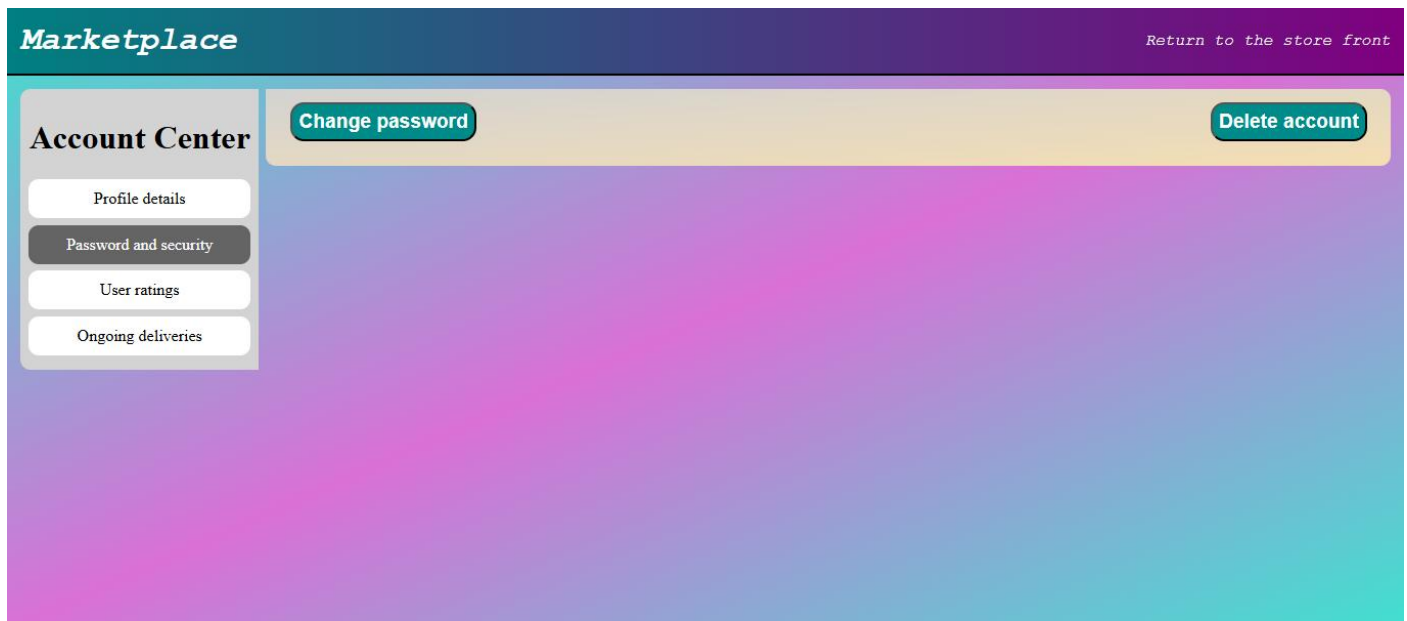

Account Centre: Account management

You can access the account centre by clicking the “My Account” link when you are logged into an account.

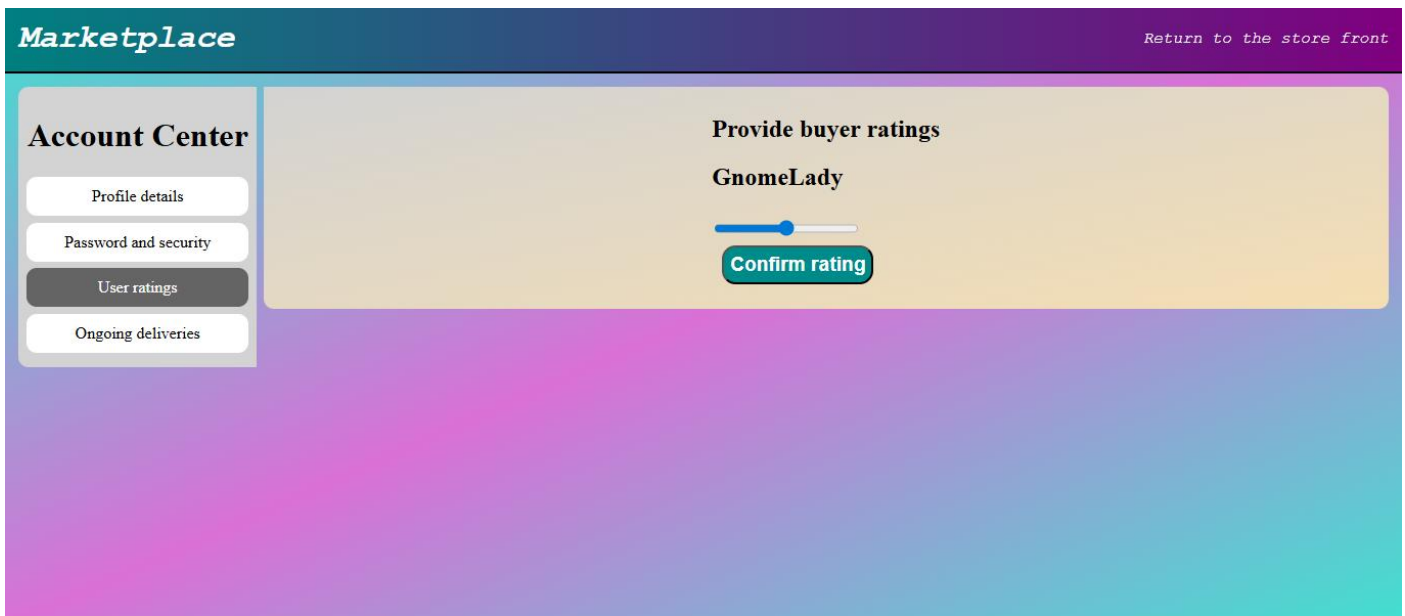

The profile details page displays your account information and enables you to log out of the account by clicking the “Log out” button. You can also edit product details if you are a vendor instead of a buyer, which is outlined in the “Products: Product management” section.

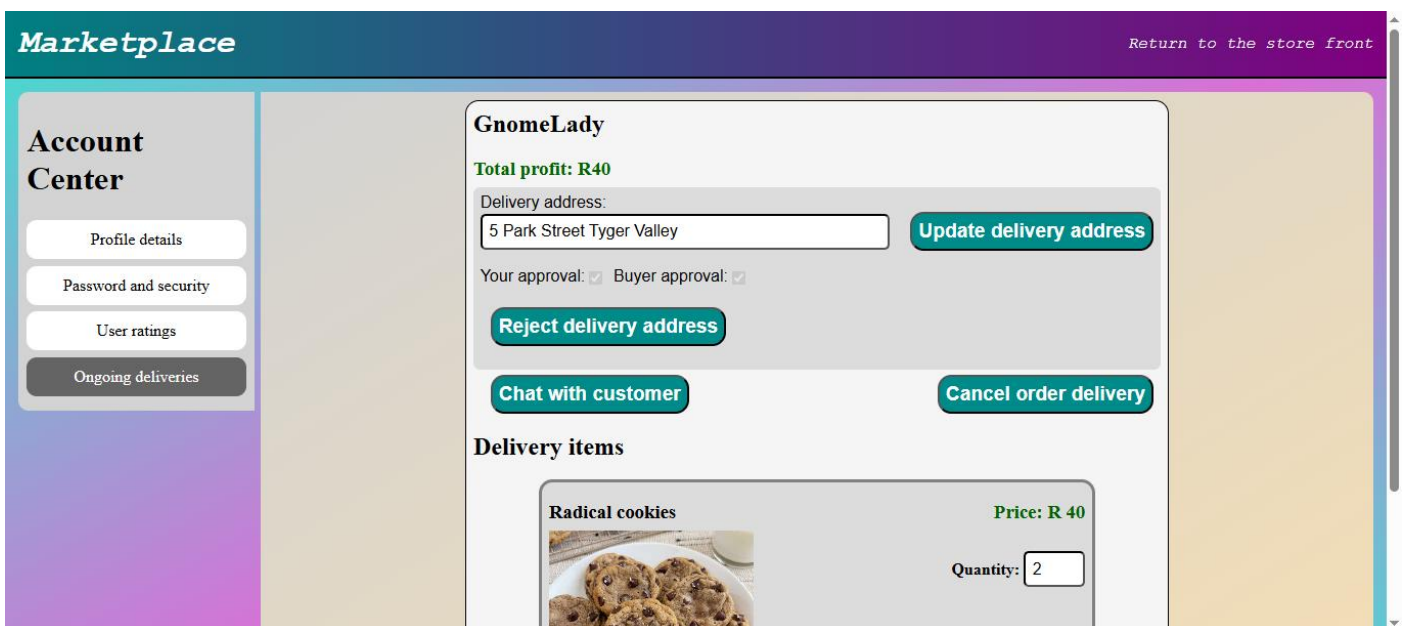

The password and security page can be accessed by clicking the “Password and security” button. This web page enables you to change your password by clicking the “Change password” button or deleting your account by clicking the “Delete account” button.

The screenshot shows the 'Marketplace' header and 'Return to the store front' link. The main content area has a light beige background with the title 'Update password' centered at the top. Below the title, there are three input fields: 'Password:', 'New password:', and 'Confirm new password:'. Each label is followed by a white rectangular input box. At the bottom left of the form area, there is a dark teal button with the text 'Change password' in white.

The change password page requires you to type in your original password and the new password that will replace it.

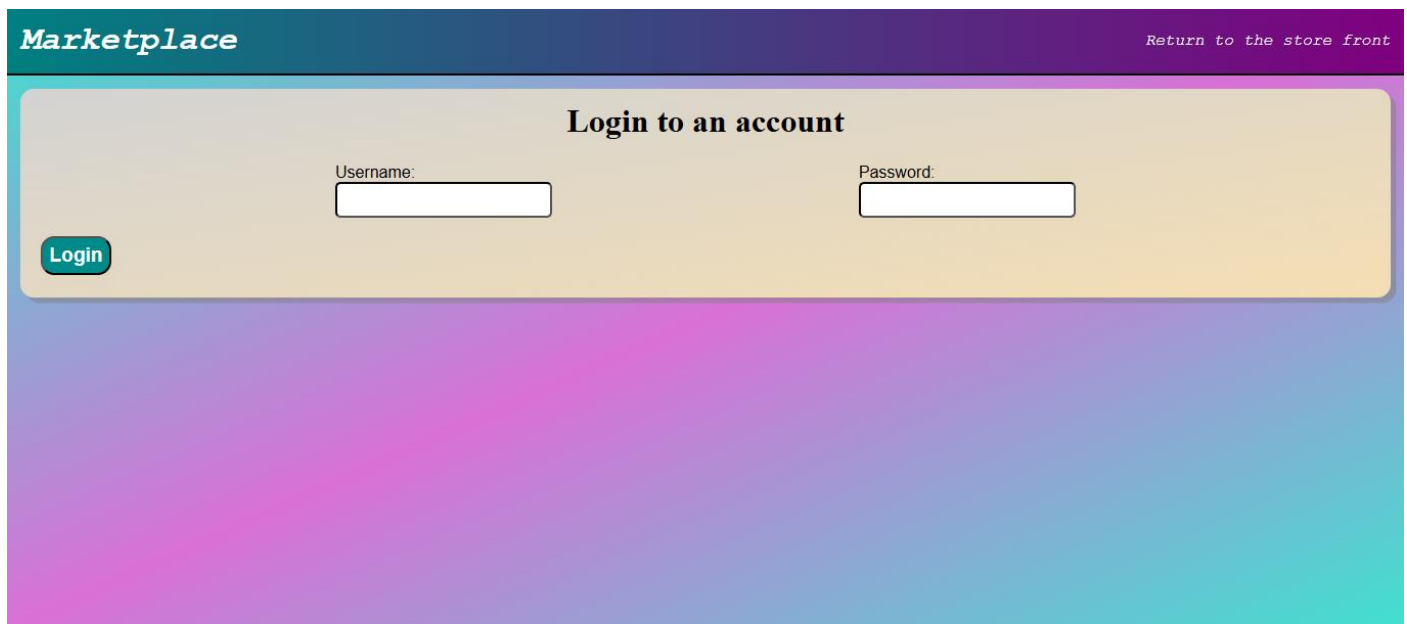

The user ratings page can be accessed by clicking the “User ratings” button that displays all buyer and vendor ratings that can be performed by using the slider to rank the user from one to five stars and confirm the rating by clicking the “Confirm rating” button.

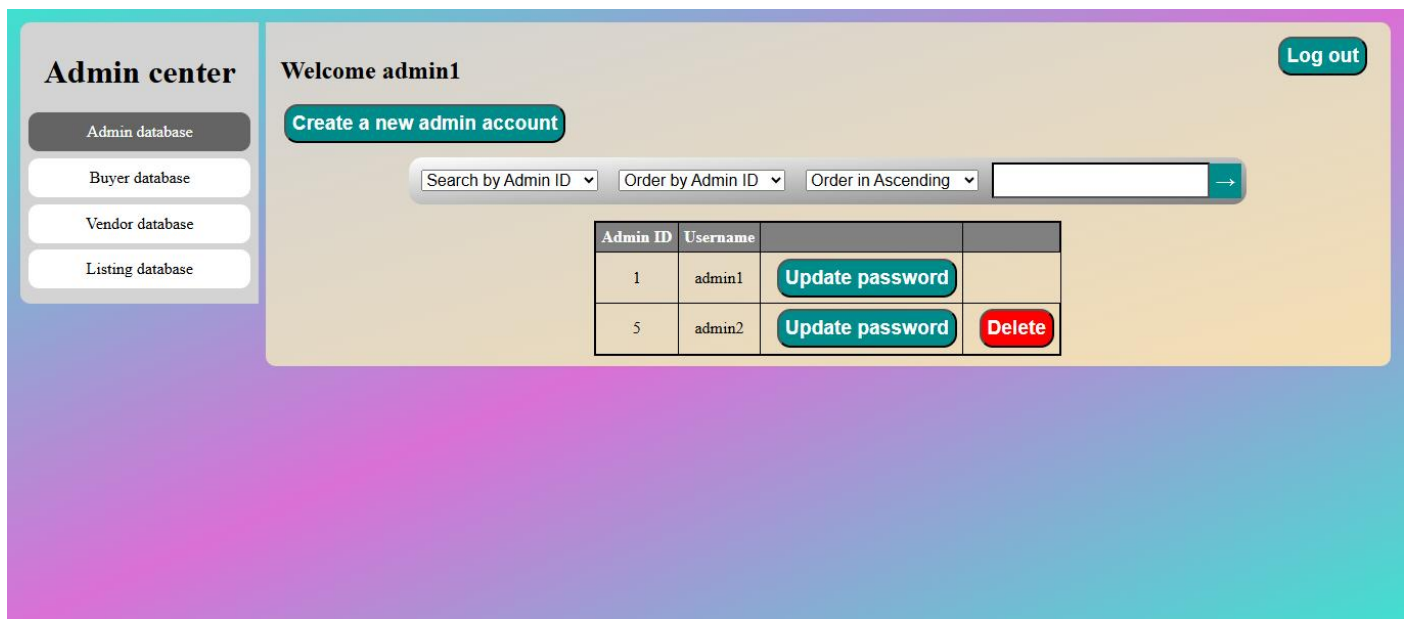

The ongoing deliveries page can be accessed by clicking the “Ongoing deliveries” button that appears if you are a vendor and displays all deliveries that you are involved with. The functionality of this page is mentioned in the “Products: Product management” section.

Admin: Administrative features

The image shows a login form titled "Login to an account" within a "Marketplace" header. The header also contains a "Return to the store front" link. The form has two input fields: "Username:" and "Password:". Below the "Username:" field is a "Login" button. The background of the page is a gradient of purple, pink, and blue.

In order to access the admin centre page of the platform, you must login into an admin account using the admin credentials.

The image shows the "Admin center" dashboard. On the left is a sidebar with links: "Admin database", "Buyer database", "Vendor database", and "Listing database". The main area is titled "Welcome admin1" and includes a "Log out" button. Below the welcome message is a "Create a new admin account" button. Further down is a search bar with three dropdown menus: "Search by Admin ID", "Order by Admin ID", and "Order in Ascending", followed by a search button. Below the search bar is a table with two columns: "Admin ID" and "Username". The table contains two rows: one for "admin1" and one for "admin2". Each row has an "Update password" button. The "admin2" row also has a "Delete" button.

Admin ID	Username		
1	admin1	Update password	
5	admin2	Update password	Delete

The admin database web page displays all admins on the platform. The admin called "admin1" acts as the highest-level admin that can delete any admin account by clicking the "Delete" button. However, all admin users can create new admin users by clicking the "Create a new admin account" button and log out of the admin account by clicking the "Log out" button at the top right of the above image. Moreover, the search bar can be used to search for specific admin users with additional specifications.
